PERSONAL STATEMENT

Backend-focused Software Engineering graduate with hands-on experience building and maintaining server-side features, data persistence and automation. Strong in Java/Kotlin, SQL and Docker with solid fundamentals in OOP, APIs and testing. Customer-facing background alongside engineering work — clear communicator who enjoys debugging and delivering practical improvements.

PROJECTS

Men's Shed Tool Booking System

- Developed the UI for a community tool booking system, covering registration, browsing inventory, and making booking.
- Integrates the interface with SQLite-stored tool and booking data to present availability and booking confirmations.
- Coordinated with teammates and client to align UI requirements with the underlying data model and system behaviour.

Napier Bank Messaging System

- Built C# WPF application to simulate secure internal bank messaging with responsive UI.
- Implemented SMS-style message input with automatic abbreviation expansion to improve clarity and consistency.
- Design application logic to validate inputs and standardise message formatting before sending/displaying.

Software Engineering Methods

- Contributed to a team software engineering project using an industry standard development process, including UML-based design.
- Developed core backend functionality in Java, implementing modular components with clear separation of responsibilities.
- Used Docker to build this Linux based project.
- Collaborated on requirements, design reviews and integration to ensure features worked end-to-end.

WORK EXPERIENCE

Freelance Backend developer

Online Game Platform

July 2025-Present

- Built and maintained server-side features in Java/Kotlin, delivering enhancements and bug fixes in a live environment.
- Implemented configuration-driven behaviour using JSON/YAML for permissions, automation and feature toggles.
- Triaged and resolved issues via a ticket workflow, reproducing problems from logs and delivering reliable fixes.
- Collaborated with administrators to plan releases, deploy updates and optimise performance with minimal downtime.
- Managed source control with Git, using disciplined commits and versioned releases to keep changes traceable.
- Supported a community of 20 active users, responding to bug reports and requests via Discord tickets.

Shift Leader

Tesco

Jan 2025-Present

- Responsible for opening/closing duties, cash handling, and maintaining smooth store operations in a high-volume environment.
- Trained and supported new starters, communicating procedures clearly and ensuring consistent standards and compliance.
- Resolved customer and operational issues under pressure, following processes accurately, escalating appropriately, and maintaining health & safety/licensing standards.
