EDUCATION

Edinburgh Napier University
BEng Software Engineer 2019-2024

SKILLS

Python	◆◆◆◆◆
C / C++	◆◆◆◆◆
Java	◆◆◆◆◆
HTML & CSS	◆◆◆◆◆
Agile / Scrum	◆◆◆◆◆

CORE SKILLS

Problem Solving	◆◆◆◆◆
Teamwork	◆◆◆◆◆
Self-Motivation	◆◆◆◆◆
Attention to detail	◆◆◆◆◆
Communication	◆◆◆◆◆
Time management	◆◆◆◆◆
Adaptability	◆◆◆◆◆
Customer Service	◆◆◆◆◆

HOBBIES

- Assembling custom PCs
- Soldering small electronics
- Online coding challenges
- Snowboarding & team sports

PERSONAL STATEMENT

I'm a Software Engineering graduate with a strong interest in web development, problem-solving, and learning new technologies. Through university and personal projects, I've built a solid foundation in Java, Python, and full-stack development, and I enjoy applying these skills to real-world challenges. I'm naturally curious and hands-on — from building custom PCs to experimenting with small electronics — and I bring that same energy to writing clean, efficient code. With experience in both technical and customer-facing roles, I'm adaptable, reliable, and ready to contribute to a collaborative team environment.

WORK EXPERIENCE

Shift Leader / Colleague

Tesco Jan 2025-Present

- Greeted customers in a friendly and professional manner.
- Stepped up to lead front-end operations, supervising checkout colleagues and supporting day-to-day store functions.
- Lead by example on the shop floor, ensuring high standards of service and compliance.
- Ensured compliance with health and safety regulations, resulting in a safe and productive work environment
- Enforced company policies and procedures to ensure that all employees followed company guidelines

Food & Beverage Team Member

DoubleTree By Hilton July 2021-Jan 2025

- Deliver high-quality service at large events, including weddings and conferences.
- Efficiently manage bar and food operations under pressure.
- Managed the food and beverage service onboard, ensuring all passengers were provided with a positive experience.
- Maintained a clean and organised bar, ensuring compliance with health and safety regulations.

PROJECTS

Men's Shed Tool Booking System

Team Project | Edinburgh Napier University

Technologies: Python, SQLite, CSV

Role: Front-End Developer

Developed the user-facing interface for a booking and inventory management system designed for a community tool-sharing organization. The system enabled users to register, browse tools, and make bookings through a clean and functional UI.

Napier Bank Messaging System

Solo Project | Edinburgh Napier University

Technologies: C#, WPF

Developed a desktop application simulating secure internal banking communications. The system handled short-form SMS-style inputs and expanded abbreviations to full messages, improving clarity in financial communications.

Software Engineering Methods

Team Project | Edinburgh Napier University

Technologies: Java, Docker, UML

Role: Back-End Developer

Contributed to a team-based software engineering project focused on applying industry-standard development processes and tools.

Developed core backend functionality in Java using modular and containerized components via Docker.

Created detailed UML diagrams and use case specifications to guide system design and communication.

Designed and executed unit tests to ensure backend robustness and consistency.
